Producing Business Solutions for
Permanent & Specialty Crops

Targeted Farm-to-Market Business Solutions

With two-thirds of Pinion's business professionals dedicated to the success of the food and agriculture industry (many of whom are farmers or producers themselves), we bring a unique understanding of all the aspects associated with each permanent and specialty crop's production, sale, and processing.

Our core competency is helping vegetable, fruit, nut, and forest plantation growers, producers, and manufacturers achieve financial prosperity.

Today's specialty crop marketplace is experiencing so many nontraditional elements that have become critical to an agribusiness' survival. We can provide you with the necessary specialists to ensure your success – from policy to plate. Pinion advisors are dedicated to the plight of the field, and providing solutions for the challenges that impede the long-run profitability of your business.

Protecting what you've built is an investment that pays for itself.

- Obtain higher-level accounting expertise
- Strengthen your overall financial position
- Enhance cash flow, budgeting, and borrowing
- Increase equipment efficiency and capital expenditures ROI
- Determine what crops will be most profitable to plant
- Find out how much debt your operation can handle
- Tap into expert resources for rewarding business decisions
- Take farm management and operations to the next level

*Pinion helps producers...grow, seize, build, survive,
manage, and surpass all expectations.*

Our proactive advisors understand your business, and can strategically organize financials, manage risks, provide sustainability, and source opportunities to secure the longevity of your agribusiness.

Trustworthy insights, effective decisions, and productive results
