

## Holistic Conservation Planning

### Creating a conservation plan doesn't have to be a painful process.

As a certified Technical Service Provider (TSP), Pinion offers holistic conservation planning, design, and implementation services to agricultural producers such as farmers, ranchers, and private forest landowners on behalf of the Natural Resources Conservation Service (NRCS).

Pinion's specialized land advisory team can create a comprehensive roadmap for your farm, aligned with your production goals, capital improvement plans, and resource concerns with available programs through the NRCS – all without you leaving your farm. Our team comes to you, saving the trip and time of visiting the NRCS office.

### Creating a Road Map for Your Farm

As Certified Level 3 Conservationists, our specialized advisors help you to best manage your property's unique natural resources while improving the sustainability and productivity of those resources. **Our land experts ensure you reach your conservation goals by providing:**

- Alignment with your farming practices and future capital improvement plans
- A pathway for holistic project planning, management, and QA/QC
- In-depth review of 160+ individual national programs and unique state programs
- A customized plan outlining all available NRCS programs that fit your farming practices
- Identification of cost share opportunities such as:
  - » Drainage tile
  - » Earthmoving
  - » Energy or irrigation efficiency

Certified TSP Level 3  
Conservationists

*These services do not commit you to performing specific practices. It does provide a roadmap for cost share and other program options.*

# Protecting your greatest asset.

As the greatest asset for producers, and the heart of all operations for agricultural businesses, our land experts recognize the importance of land and what it means to you. Pinion is dedicated to protecting this critical asset and to finding ways to preserve it and make it more profitable.

With roots dating back to 1932, Pinion has a depth of resources and expertise to make a difference and help producers, landowners and ag businesses thrive. From consultation, engineering, facilitation, and management – Pinion land experts strategically enhance and protect land resources, as well as explore opportunities that can augment income for decades to come.
